

October 15, 2023

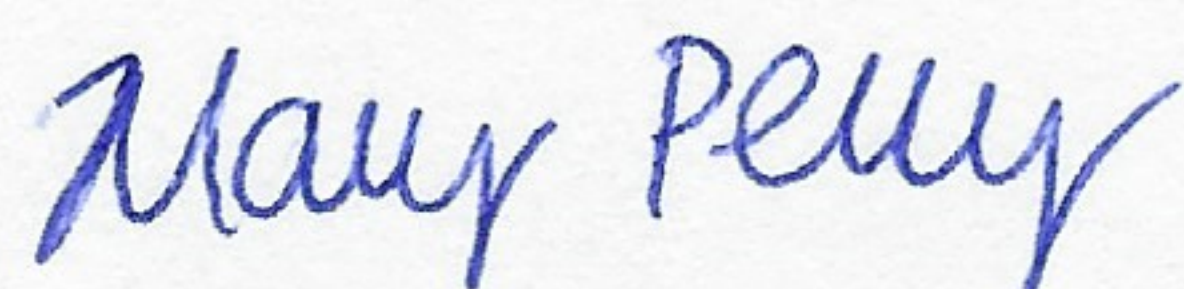

To Whom It May Concern:

I am writing this letter of recognition on behalf of Manuel Peña Morros.

Dr. Barry Sears and I had the opportunity to meet Manuel virtually in March of 2023. At that time Manuel was training to participate in a bodybuilding competition in the Men's Physique Category. He had been following the nutritional science of Dr. Sears, was a devoted follower of the Zone diet and was hoping Dr. Sears' would look through his nutritional program and offer his expertise on fine tuning his plan to reach his goals. In our initial introduction it was easy to see Manuel's passion and dedication to nutrition and fitness and desire to share that enthusiasm with others. The level of dedication and detail he kept he on his body metrics, macronutrient intake, training program, goals and expectations was impressive for anyone, let alone a 17-year-old. After achieving two national awards in bodybuilding, Manuel reached out in May with the hope of collaborating on an app he called Diaita. As a fitness enthusiast his hope was to share his passion for improving the lives of people through wellness and revolutionize the way people approach nutrition, fitness, and meditation through customized nutrition plans, exercises, and meditation practices to promote overall wellness. While our other ventures didn't allow for collaboration at that time, it wasn't lost on us how much thought, desire to share the Zone with others, and work had already been done prior to reaching out to us.

In our short time of knowing Manuel, if he applies the same passion, enthusiasm, dedication and effort we've seen him apply to his fitness and nutrition goals, we can only imagine what he'll do in a course of work he is excited to pursue in the future.

Sincerely,

Mary Dinehart- Perry, MS, RD, LDN
Clinical Trials Director, Zone Labs, Inc.
